

## DIALux EVO for Beginners (Language: English)

**Trainer:**  
Ms Suen Kwok (Hong Kong)  
Lighting Designer  
Accredited DIALux Trainer  
MA (ALD)

*Date: 29 Oct 2018, Monday*

*Time: 10am – 5pm (1 hour lunch)*

*Venue: Welkin Computer Centre, 2/F, Chinachem Tower, 34-37 Connaught Road Central, Hong Kong*

*Fee: HKD\$2,200 per person (PC provided, with certification)*

---

### **Course description:**

This course targets to those who are new to DIALux EVO, you will learn how to build simple creations from scratch. If you have been using it for a while, the course will definitely strengthen your skills as well!

We will explore the DIALux user interface together, build rooms, windows, doors & types of ceilings. While arranging furniture will bring you plenty of enjoyment, you will also have the chance to create your own objects with customized textures!

Putting calculation planes & obtaining results will be the highlight of the day, you will have the chance to understand different photometric information and to use DIALux plug-in.

Q&A is always encouraged & you will leave the classroom with a handful of skills at the end of day! You will be granted certification upon completion!

## DIALux EVO for Advanced Users (Language: English)

**Trainer:**  
Ms Suen Kwok (Hong Kong)  
Lighting Designer  
Accredited DIALux Trainer  
MA (ALD)

*Date: 30 Oct 2018, Tuesday*

*Time: 10am – 5pm (1 hour lunch)*

*Venue: Welkin Computer Centre, 2/F, Chinachem Tower, 34-37 Connaught Road Central, Hong Kong*

*Fee: HKD\$2,200 per person*

*(PC provided, with certification. **10% discount** for those also registered for Beginner class)*

---

### Course description:

This course targets to experienced users of DIALux EVO. During the class, learners will be given tasks to polish some fundamental skills, like creating rooms & placing apertures, setting calculation objects & making textures. We will move on to make multiple-floor buildings & light scenes creation. Daylight implementation will be one of the highlight, we will imitate how daylight would affect your interior space in different time & date. UGR calculation & other functions in calculation objects will also be discussed.

We will then move to outdoor modeling, we will go through the logic to create façade elements, adding buildings ...etc. We will clarify those new calculation options which would reduce your work time. As a bonus, we will learn to create something more stunning, but meanwhile a secret!

Certification will be granted at the end of the class as recognition.
