- Please fill in, print and send this form to EIB/KNX testing department of DIAL GmbH -

I confirm,

1. that

1.1

Hint: prototypes or preliminary devices are not allowed for interworking tests!

1.2 contains the same stack that will be used by the series devices without any changes

Hint: preliminary devices or development samples my be used for stack tests.

1.3 use the same software (firmware) for the coprocessor. The other devices will be listed in the test report

1.4 have only the following differences that need not to be registered according to volume 5 of the KNX handbook:

The device with number consists of the complete functionality and may be used as reference for the interworking test. The other devices will be listed in the test report.

Hint: You may use a seperate sheet for a verbose explanation.

2. that the ETS product data and applications listed in paragraph 5.

2.1 are identical.
The other ETS product data and applications will be listed in the test report.

2.2 have only the following differences that need not to be registered according to volume 5 of the KNX handbook:

The ETS product data with number consists of the complete functionality and may be used as reference for the interworking test. The other product data will be listed in the test report.

Hint: You may use a seperate sheet for a verbose explanation.
